Professional Summary

Data Analyst with internship experience in Business Intelligence, Data Analytics, and Machine Learning. Skilled in Python, SQL, Power BI, Tableau, AWS, and Flask for data analysis, dashboard development, ETL workflows, and database management. Passionate about building data-driven solutions through analytics, AI, and collaborative projects.

EDUCATION

Yeshwantrao Chavan College of Engineering (YCCE), Nagpur Aug 2023 – Jul 2027

B.Tech in Computer Science Engineering (IoT) **CGPA: 8.14/10**

Experience

Data Analyst (Part-Time) — Analytics Career Connect (ACC), Remote May 2026 – Present

- Developed Power BI dashboards and KPI reports to support business decision-making.
- Performed data cleaning, transformation, and exploratory data analysis using Python and SQL.
- Collaborated with cross-functional teams to automate reporting workflows.

Data Analyst Intern — Infotact Solutions, Remote Dec 2025 – Mar 2026

- Developed RFM-based customer segmentation using Python and SQL.
- Built interactive dashboards using Power BI for business reporting.
- Queried cloud datasets using AWS Athena, Amazon S3, and PySpark.

Projects

Real-Time Carbon Footprint Monitoring & Analysis ESP32, Flask, Supabase, SQL

- Developed an ESP32-based IoT system for real-time carbon emission monitoring.
- Designed and managed a Supabase SQL database with Flask APIs for real-time data synchronization.
- Built a cloud-enabled monitoring platform for live sensor data visualization.

MediFlow Cloud – Healthcare Analytics Python, SQL, AWS, Power BI

- Built a healthcare analytics solution for patient readmission and resource utilization.
- Processed data using Python, SQL, AWS Athena, and Amazon S3.
- Developed Power BI dashboards for KPI tracking and data-driven insights.

Hackatron Team Hawks – AI Startup-Investor Matchmaking Platform Python, Machine Learning

- Developed an AI-powered startup–investor matchmaking platform for intelligent startup discovery.
- Designed recommendation workflows to improve startup profiling and investor matching.
- Secured **1st Prize** at the LaunchX National-Level Hackathon.

Achievements

- **Group Leader, Analytics Career Connect (ACC)** – Led interns, coordinated analytics projects, and mentored members in Python, SQL, and Power BI.
- 15+ Hackathon Experiences — Participated in competitive hackathons, developing innovative AI, data analytics, and full-stack solutions.
- Winner – AI & Machine Learning Hackathon.

Certifications

- Deloitte Australia – Data Analytics Job Simulation (Forage)
- NPTEL – Data Analysis and Decision Making

Technical Skills

Languages: Python, SQL

Analytics: Power BI, Tableau, Excel, EDA

Machine Learning: Scikit-Learn, Regression, Classification, Model Evaluation

Data Engineering: ETL, Data Cleaning, Data Wrangling

Cloud & Database: AWS, PostgreSQL, Supabase

Developer Tools: Git, GitHub, Docker, VS Code, Flask

AI Productivity: ChatGPT, Claude, Cursor, GitHub Copilot, OpenCode, n8n
